

Product Description

GAO's T.4 software implements ITU-T T.4 Recommendation, which defines the characteristics of Group3 facsimile terminals that enable black and white documents and also optionally color documents to be transmitted on the general switched telephone network, international leased circuits and the Integrated Services Digital Network (ISDN). GAO's T4 software will work with T.30 and V series standards to enable two fax modems communicate with each other.

Leadership in Embedded Communications Software

With over a decade of experience, GAO leads the embedded communications software market by providing comprehensive modem, fax, speech, and telephony technologies; broad technical expertise; and unsurpassed support to our world-class customers including electronics, communications, and semiconductor companies across the globe. GAO's software integrates easily with MP3, MPEG, TCP/IP, and most popular real-time operating systems.

Rigorous Testing

GAO's testing facilities are equipped with state-of-the-art test equipment. Our software is rigorously tested on TAS, Consultronics, Rochelle, Advent and Telegra equipment under various channel models according to the relevant ITU or TIA standards. All GAO's speech software has passed the test vectors specified by the ITU. Our telephony software meets all appropriate TIA, EIA, BellCore, and Mitel standards.
